

Defect Log

Team 21: Jonathan Poholarz, Aaron Nordhoff, Andrew Ring, Rohan Swaroop, Khanh Quoc Tran

Defect No.	Defect	Defect Severity	Test Case No. Or Description
1	User cannot log out	Moderate	1601
2	Item shown as available despite being rented out	Moderate	All items maintain the green “available” tag even when rented
3	Invalid item for picture upload	Moderate	Allows file of any type to be uploaded
4	Return button does not return change item status	High	“Return item” button not change back to rent
5	Return button does not notify users on the waitlist	High	When clicking return item, users on the waitlist do not receive an email or a push notification
6	Image does not load until page is refreshed	Low	When an item is posted, the user is navigated to the item listing page, but the uploaded image is not displayed until the webpage is refreshed
7	Users can rent the items that they post themselves.	Moderate	Users can click rent on items they posted when on the available items page.
8	The price field has no validation	High	0405-incorrect/no input
9	Item picture does not show in My Items	Moderate	The item image does not display in the My Items page
10	Updating item image does not change image in available items	High	0501
11	When posting new item, there is no field for location	High	0406

12	When posting new item, there is no field for rent duration	High	0404
13	Rent button does not display rental UI	High	0801 (not doing anything in 6.1.9 of backlog)
14	Waitlist button does nothing	High	1201
15	Two users rent an item simultaneously	High	If user 1 rents an item, and then another user rents the same item before refreshing the page, user 1 is waitlisted, and user 2 gets the item
16	When editing item, rate defaults to hourly despite original selection	Moderate	When editing item, rate defaults to hourly despite original selection
17	The post items page can be accessed without logging in	Moderate	When no user is logged in, it is still possible to go to the post items page
18	Hamburger menu does not allow anything to be clicked	High	When using a smaller window size, the hamburger menu containing the tabs does not work
19	Title text overlaps with inputted value when editing	Low	When editing an item, if a field was previously filled out but has not yet been clicked on, the sample/title text overlaps the entered text
20	Title text is not formatted correctly for long titles	Low	If a title is really long and has no endlines, the text extends the page to the right
21	Lender is not notified when an item is rented	High	1001
22	Viewing “Available Items” page causes high CPU usage	Moderate	Abnormally high CPU usage when viewing available items
23	Item status is not updated on “My Items” page	Moderate	Items always have the rent button on the “My Items” page, regardless of their

			status
24	Users can overwrite other items' images	High	When one user creates a new item with just an image and blank fields, it can overwrite other items' images to be the same file
25	The Lendr logo appears to be a button	Low	The Lendr logo on all pages is clickable like a button but does not appear to do anything besides add /# to the url
26	Users can waitlist their own items	Moderate	The waitlist button is clickable on a user's own listed items, potentially adding themselves to their item's waitlist
27	Image information not carried over to edit pages	Moderate	When editing a listed item, the image upload does not inform the user of the current image if there is one and always appears blank

We also experienced the following error but were unable to find its cause:

28	Item gets posted twice with garbage for price	Moderate	N/A
